SETTING UP YOUR NEW COMPUTER (Con't)

Click Start>>Control Panel. Double-click Windows Firewall. Select Off>>OK. Ignore any warnings.

--If anti-virus software came with the computer, these are generally pay programs with a 90-day tryout period. If you plan to continue to use this anti-virus program, YOU MUST BUY A SUBSCRIPTION. This is critical. An out-of-date anti-virus program will not protect you.

Set up the program for automatic updates.
