AUGUST 30, 2004 Board Meeting Minutes Continued

Broadband - Roger Turner: Workshop still not hooked up. WestCoast is no longer soliciting Dial-Up connections.

Old Business - Roger stated and commended Marge Armstadter on the update of the By-Laws. They are now at our lawyer's. Need another meeting, which can be an ongoing process unless we keep the brakes on. Katy reminded us that the contract with the lawyer was a flat price. No response from Debby Lamb as yet. Hopefully by Nov we can vote on the revisions.

New Business **-1.** Katy announced that there will be no more August Volunteer dinner . The participation at this time of year is not good. She has booked Clubhouse 5 for March 2nd for the dinner.
        2. Roger has appointed Charles Nahas to be head of the nominating committee. No word on that yet.
        3. Barbara suggested a note of thanks to Kaye for her past work. Katy raised objections because other persons were not sent "thanks" and they were deserving also.. Different items were discussed. No resolution as yet.

Meeting Adjourned at 5:00 PM

SWALLOWED BY THE COMPUTER

The computer's swallowed Grandma,
Yes, honestly, it's true.
She pressed 'control' and 'enter'
And disappeared from view.

It's devoured her completely––
The thought just makes me squirm.
Maybe she's caught a virus
Or been eaten by a worm.

I've searched through recycle bins
And files of every kind;
I've even used the internet
But nothing did I find.

In desperation I asked Jeeves
My searches to refine.
The reply from him was negative;
Not a thing was found online.

So, if inside your 'Inbox'
My Grandma you should see
Please 'Scan', 'Copy' and 'Paste' her
And e- mail her back to me.

Finding Uncommon Methods for Common Tasks

There's a core set of Internet Explorer skills - and features that you should use all the time - if you want to speed up your Web browsing enormously. Unless you have anabysmally slow Internet connection, every IE user should know these three timesaving Key communications.   :

*Ctrl+Enter: If you type the middle part of an address in the Address bar - say, Dummies - and then press Ctrl+Enter, IE immediately puts an http://www. on the front, and a .com on the back. Type Dummies and press Ctrl+Enter, and IE immediately knows to look for **http://www.dummies.com**.

*Shift+click: When you click a link, sometimes the new page replaces the old window; sometimes the old window stays around and the new one appears in a window of its own. Usually, the person who designs a Web page decideswhat happens, but you can take over. Sometimes you wantto leave the old page in place while you look at thenew page - for example, if you're going through Google and want to look at several search-results pages at the same time. To force IE to open a Web page in a new window, hold down Shift while you click the link.
    Note: If you use this last one all the time you will have way too many windows open. Use it judiciously.
