A hearing revolution with healthable devices

Dr. Rachele Orsini, Au.D, Central Florida Field Representative

Starkey Hearing Technologies

Today's technology is more advanced than ever before with artificial intelligence and sensors leading the way and changing lives in many areas including healthcare. Hearing technology has always been an effective and proven solution for individuals with hearing loss but what if we could do more with an ear worn device? At Starkey we are the first and only manufacturer with a life changing healthable device that incorporates Artificial Intelligence and Sensors that do more than just improve hearing.

We have started a hearing revolution with healthable devices that do more for us....they go beyond the traditional hearing aid. Did you ever think that your hearing device would track your physical movements, provide you with a daily brain engagement score, detect a fall and send alerts, answer to voice commands, translate 27 languages in real time and much, much more. This session will

highlight who is Starkey and why you should rethink your hearing healthcare with a healthable.

TRACK 3

What's happening with your group while everyone is staying safer in place? Let's share what we are doing with our groups? Meeting via Zoom or another online app? Streaming via Facebook or YouTube? Members are afraid of anything online. Overthinking how to start having meetings via Zoom? Let's help each other through this crisis and, at the end, still have members who want to attend meetings.
