Windows 10: Creators Edition Spring Update

- **Determine what version of the OS you presently have –**
 1. Click Start – Settings – System – About. You're current if it says 1709. If there's an update waiting – you'll see a notification. To ensure your PC is ready, check for updates now.
 2. Click Start again – Settings – Update and Security – Windows Update – Check for updates.
- **What to expect –**
 1. Microsoft notification that Spring Update has been downloaded.
 2. Asks if OK to install
 3. Allows you option to refuse and select an appropriate time
- **How to prepare –** <https://www.cnet.com/how-to/5-tips-to-prepare-your-pc-for-windows-10-spring-creators-update/>
