NEXT GENERAL MEETING

Monday, OCTOBER 18, CH#3 at 6:30 pm

PRESENTING: GENE BARLOW. . .

- . . businessman, educator, writer and talented presenter, representing many vendors over the years with products that he finds valuable and effective for home and small business pc users. Gene now represents his own User Group Store (www.usergroupstore.com), offering user group members and their guests considerable discounts on software.
- Gene will demonstrate 3 of the most exciting products in his line at the general meeting this month:

Secure Clean — a program to prevent personal and private information from building up on your hard drive.

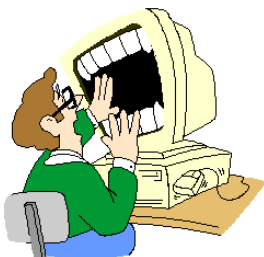

Move Me — a clever utility to help users easily transfer all of their application programs, settings and data files from an old computer to a newer computer.

True Image — backing up your hard drive with True Image, a drive-imaging tool from Acronis. (Steve Bass from PC World said “I’ve been using True Image for regular backups since the beginning of the year. So far, I haven’t had a lick of trouble, either with creating the image, adding incrementals, or with the restoration function....I’m happy with True Image’s simplicity”.) Backing up your hard drive is possibly the most important thing you should do with your computer. .

Gene and his wife Linda visit about 100 user groups each year. He is one of the most interesting presenters you will hear. Don’t miss this meeting.

The computer workshop gets many requests for names of Internet Service Providers. To find an Internet provider see yellow pages “**INTERNET ACCESS**”

Here are some Internet Service Providers:

aol.com
yahoo.com
earthlink.net
juno.com
msn.com

pacbell.net
prodigy.net
dslxtreme.com
netzero.net
net-star.net
