## “WHITTLE’S PICKS FOR THE DIGITAL HOME”

Are you enjoying the digital revolution that is transforming your home? In the ideal digital home, PC’s and consumer electronic devices are not only protected against Internet security threats, but work together to deliver digital media such as pictures and video and music to the parts of your home where you want it. Enabled by innovation’s rapid pace, you can re-invent your lifestyle, waste less time, and have more fun. The possibilities for managing your own digital content and entertainment are more engaging than ever before. You can now take pictures and videos with digital cameras and camcorders, add your choice of background music, and moments later share them with family and friends via e-mail or CD or even by DVD, displayed on our television sets in “home theaters.”

Our speaker for this meeting is David B. Whittle, author of “Cyberspace: The Human Dimension” and named by Working Woman Magazine as “one of America’s most original technological thinkers.” Dave’s been a leader in the PC revolution since 1979, and an opinion-leader in the PC industry since his days as OS/2 Evangelist at IBM in the early ‘90s. Most recently, he’s been writing for **Smart Computing**. Now he is bringing to you his favorite discoveries from recent trade shows in order to demonstrate and introduce new products that open up new horizons of possibility or solve problems you might be facing.

Would you like a brief look at the latest gadgets, goodies, software, and services available for the digital home? Would you like to have software that takes your digital photos and video footage and almost magically transforms it into a movie on DVD or CD that is a surprising delight to watch? Ever wish you could rise above ordinary flat snapshots of those special places you visit and have an immersive, 3 dimensional picture of the place so you can revisit the scene looking in any direction? Is cable clutter and charger confusion and tangle a serious nuisance? Most importantly, do you ever feel as if there is more to know about Internet security than you’re being told? If you answered yes to any of these questions, then you won’t want to miss Dave Whittle’s presentation at our next monthly meeting!
